PROFESSIONAL SUMMARY

IT Service Management and Infrastructure professional with ~4 years of hands-on experience managing high-volume enterprise operations across Incident, Change, and Service Request Management. Consistently handling 800+ incidents per month with full SLA compliance across large-scale, multi-client environments. Deep expertise in ITIL-aligned governance, impact analysis, risk assessment, and cross-functional coordination spanning infrastructure, network, security, storage, and vendor teams. Proven ability to drive process improvements through UCMS initiatives, deliver structured knowledge transfer, and support major client transitions with a disciplined, process-driven approach. Recognised by clients for quality delivery, responsiveness, and consistent service excellence.

PROFESSIONAL EXPERIENCE

Analyst III, Infrastructure Services — DXC Technology

July 2022 – Present

- Manage end-to-end Incident Management lifecycle for global enterprise clients (including BP, Rolls-Royce, and Vale), handling 800+ incidents per month with structured prioritisation and consistent SLA/OLA adherence.
- Act as coordination point during high-priority P1/P2 incidents, ensuring timely escalation, stakeholder communication, bridge management, and resolution tracking.
- Lead Change Management lifecycle including RFC validation, impact and dependency analysis, risk assessment, CAB/eCAB coordination, implementation planning, and Post Implementation Reviews (PIRs).
- Perform detailed impact and risk analysis before production changes, achieving high change success rates and minimal production disruptions.
- Collaborate with cross-functional teams across infrastructure, network, security, storage, applications, and external vendors to ensure seamless operational execution.
- Maintain CMDB accuracy and CI relationship integrity to support audit readiness, configuration governance, and effective impact analysis.
- Monitor SLA/OLA/KPI performance, proactively identify service risks, and prepare operational reports covering incidents, changes, trends, and performance metrics.
- Contribute to process improvements through UCMS (Use Case Management System) initiatives, reducing recurring incidents and improving operational workflows.
- Support SCCM and MFSA-based patch management activities including scheduling, deployment coordination, compliance tracking, and post-patch validation.
- Perform Windows Server troubleshooting (service failures, performance issues, post-patch incidents) and Active Directory administration including RBAC and User Access Management (UAM).
- Work with BeyondTrust PAM for privileged access provisioning, approvals, and access governance across enterprise environments.
- Utilise VMware vSphere, AVD, RDP, HP iLO, and Dell iDRAC for remote server validation and coordination during change and incident activities.
- Support storage-related incident coordination involving NetApp ONTAP systems to ensure timely service restoration.
- Deliver Knowledge Transfer (KT), Shadow KT, and Cross KT sessions to new joiners, operational teams, and client stakeholders.
- Play a key role in major client transition activities including structured handovers, process walkthroughs, documentation, and operational knowledge transfer.
- Develop and maintain SOPs, runbooks, and operational documentation aligned with ITIL best practices.
- Regularly recognised by clients for quality delivery, responsiveness, technical ownership, and consistent professionalism across engagements.

CORE SKILLS & COMPETENCIES

ITSM & Governance	Incident Management, Change Management, Service Request Management, ITIL Framework, CAB & eCAB Governance, CMDB & Configuration Management, Audit & Compliance Support
Operations	Stakeholder Management, Vendor Coordination, Escalation Handling, Impact Analysis, Risk Assessment, Program Management Support, Cross-functional Coordination
SLA & Reporting	SLA / OLA / KPI Tracking, Operational Reporting, Trend Analysis, Service Performance Management, UCMS-driven Process Improvement
Infrastructure & Access	Windows Server Administration & Troubleshooting, Active Directory (RBAC, UAM, GPO), SCCM Patch Coordination, MFSA Patching, VMware vSphere, NetApp ONTAP, BeyondTrust PAM, HP iLO, Dell iDRAC
Tools & Platforms	ServiceNow, HPE Service Manager (HPSM), BMC Remedy, AVD, RDP
KT & Transitions	Knowledge Transfer (KT), Shadow KT, Cross Training, Client Transition & Handover, SOP & Runbook Development
AI & Productivity	Claude AI, ChatGPT, Google Gemini, Amazon Q, Codex, Qwen, Antigravity, Prompt Engineering — leveraged for documentation, reporting optimisation, and knowledge base improvements

EDUCATION

B.Tech (WILP), Computer Science & Engineering — Mangalayatan University, Aligarh	2024 – 2027
Diploma, Electronics Engineering — Ambedkar Institute of Technology, New Delhi	2019 – 2022
Information Technology — NSQF Level-2 — CBSE Skill India	2018 – 2019
Secondary (10th Standard) — Central Board of Secondary Education	2018 – 2019

CERTIFICATIONS

• AWS Certified Cloud Practitioner	• Oracle Certified Foundations Associate
• Oracle Cloud Data Management 2023 Certified Foundations Associate	• Business Intelligence Professional Foundations Certification (BIFPC)
• Aviatrix Certified Engineer – Multicloud Network Associate	• Microsoft Power BI Data Analyst (PL-300)

TRAININGS & INTERNSHIPS

Student Partner — IIT Roorkee & Cognizance (Techfest)	Jan 2021 – Apr 2021
• Supported coordination, outreach, and engagement activities during a national-level technical event.	
Campus Ambassador (Golden Level Internship) — Lyrclious	Jun 2021 – Jul 2021
• Represented the organisation on campus, supported marketing and engagement initiatives; received a Letter of Recommendation (LOR) for performance.
